

CYBAGE DEVELOPED A CUSTOM AND REUSABLE CONNECTOR FOR A FAST GROWING IT SECURITY SOLUTIONS COMPANY

About The Client

A fast growing provider of cloud ready-privilege management solutions

Provides security tools that empower 12,500+ enterprises worldwide to limit privileged account risk, implement least privilege policies, control applications, and demonstrate compliance

Business Needs

▶ Develop an easily integrable and reusable data exchange connector using the System for Cross-domain Identity Management (SCIM)

Implement integrations with third-party applications to enable exchange of data related to users, groups, and access management

▶ Develop integrations for non SCIM compliant third-party applications

Solutions

Powered by
PIE PROCESS INTEGRATED ENGINEERING

1 Served third parties such as **Azure AD, SailPoint, and Okta** during the SCIM connector development

1 Developed an SCIM-based connector for the product suite

2 Implemented custom connect configuration for business use cases that served third parties such as **IBM IGI, ServiceNow, and Splunk**

3 Created self serve runbooks and documentation for configurations and maintenance

4 Leveraged the SDKs provided by non-SCIM enabled applications and configured them for effective communication

3 Fulfilled SCIM connector development by exposing REST APIs to exchange user identities, groups, and permissions with other SCIM compliant service providers

5 Leveraged the SDKs provided by non-SCIM enabled applications and configured them for effective communication

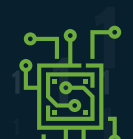

Business Benefits

Widened customer reach by enabling compatibility with **80+ user permissions and access management applications**

Reduced the software implementation efforts from **months to 1 – 2 days**

Significant cost savings by reducing additional efforts and the overall hardware dependency

Strengthened and secured the access to data through strategically limiting access via integration

Integrations

Cybage Hi-Tech

- Automotive Retail
- Customer Experience & Market Research
- Digital Security
- Enterprise Workflow Solutions & Rules Engine
- Software Tools & Platforms
- Social & Collaboration Platforms
- Human Resource Management Systems

Building next gen cyber, data, and IT security solutions
