

Modernize to Accelerate

An Automotive Data Analytics Leader Revamped Their Data Transformation Infrastructure for Faster Time-to-Market

About the Client

A leading provider of comprehensive automotive data, analysis, and intelligence that empowers businesses within the automotive industry to make informed decisions and gain a competitive edge.

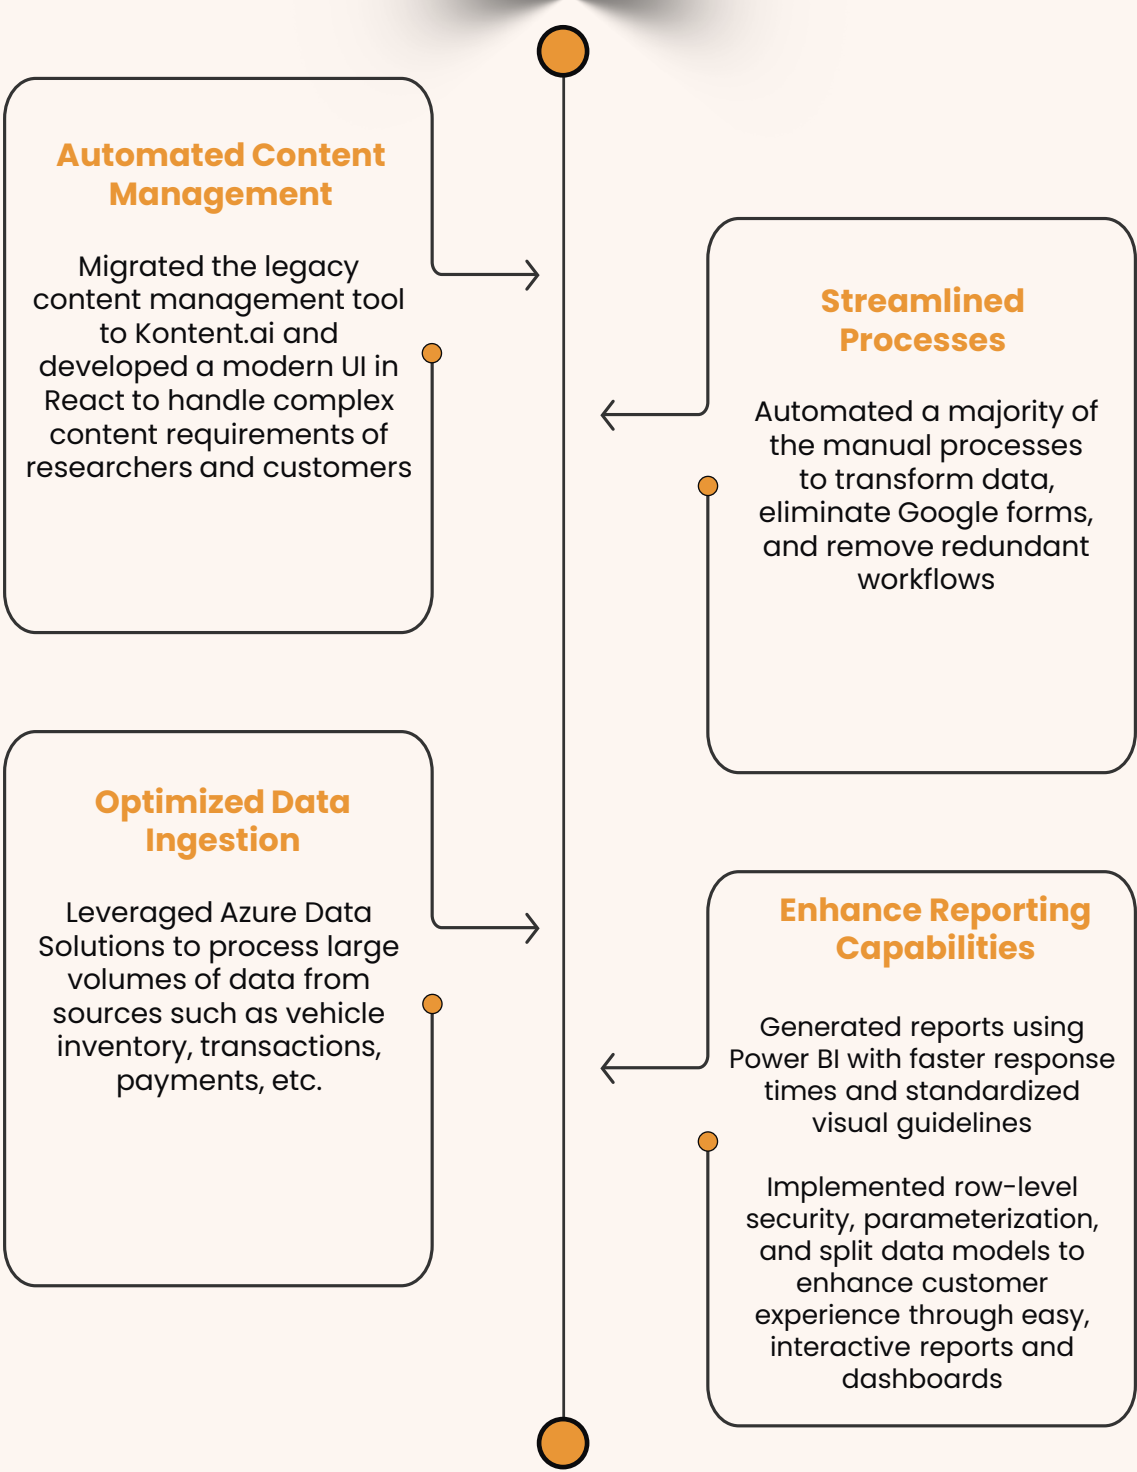

Challenges

The client's existing infrastructure relied on manual processes and outdated technologies, hindering operational efficiency and user engagement, prompting them to partner with Cybage to modernize their legacy systems by:

- Replacing their existing content management tool to reduce **manual intervention** and improve the experience for researchers and customers
- Automating siloed and manual processes to enhance overall efficiency in **automotive data research and analytics**
- Improving the **data ingestion process** for vehicle transactions and monthly payments to ensure quick and efficient data consumption by downstream applications
- Upgrading **in-house reporting capabilities** to analyze collected data points more effectively, providing better business insights across sales, finance, and operations divisions
