

Transformed accounting to become more efficient, faster, and user-friendly for a top UK and global business operations software provider

About the Client

Founded in 1978, the client is a leading provider of software solutions and services for businesses in international markets

Holds expertise in delivering software for businesses in various sectors, including accountancy, payroll, education, and legal services

Serves a range of clients, from small businesses and startups to large enterprises

Business Needs

01

Integrate the existing solution with easy-to-use quoting and invoicing features

02

Implement efficient bookkeeping processes for accountants and clients

03

Facilitate integrations with reliable payment providers

04

Consolidate fragmented data and enhance reporting capabilities

05

Automate bank synchronization to improve accuracy

06

Support seamless integration with popular eCommerce platforms

Solutions

- Developed an intuitive, cloud-based accounting software tailored for SMEs
- Redesigned and modernized the UI component library using Angular
- Streamlined user experience to enhance service for accountants
- Automated deployments with Azure CI/CD pipelines, enabling weekly releases
- Improved software quality by revamping the test suite and automation frameworks
- Implemented secure payment processing with SCA compliance for card transactions
- Integrated the software with reliable payment gateways such as WorldPay for faster payments

Technology Stack

Business Impact

- **Improved customer satisfaction** through intuitive software
- **Accelerated product releases by 2x** with weekly deployments
- **Reduced production bug leakage by 80%**
- **Enhanced operational efficiency and accuracy**
